International IDs

Should always 19 characters long:

- Breed code (3)
- Country code (3)
- Sex code (M or F; 1)
- Registration number padded with zeros (12)

Excel formulas for creating `international_id` (column AA), `sire_international_id`, (column AF), and `dam_international_id` (column AK):

```
#Animal itself

=Z2&Y2&G2&RIGHT("00000000000000"&X2,12)

#Sire

=AE2&AD2&"M"&RIGHT("00000000000000"&AC2,12)

#Dam

=AJ2&AI2&"F"&RIGHT("00000000000000"&AH2,12)
```
